

# THE PROBLEM:

Comprehensive Sexuality Education (CSE) is exposing children in publicly-funded schools to graphic sex ed and unscientific gender theories.

Educational priorities have turned from reading, writing and arithmetic to identity politics, political activism, gender exploration and high-risk sexual behavior.

# THE THREATS:

**SEXUAL & SOCIAL GROOMING:** This 2nd grade lesson from www.3RS.org exposes children to sexualized content. According to the National Center on Sexual Exploitation (NCOSE), "Exposing children to sexual content is a form of abuse." This lesson crosses a boundary from anatomy to titillating children's curiosity about sexual pleasure.

**PUSHING PLEASURE & ILLICIT SEX:** CSE is "SeXXX Ed." It promotes sexual pleasure as a right for all children. This stirs up a dangerous curiosity about sexual organs that has negative consequences. According to NCOSE, "There is a rising trend of child-on-child sexual abuse..."

Dr. Andre Van Mol, of the American College of Pediatrics, confirms, "Premature exposure to concepts their developing minds cannot grasp, grooms children for early sexual debut and predators, rather than protecting them."

**SERIOUS OR** heavy petting is also known as foreplay because often it comes before intercourse. But foreplay can be enjoyable in itself and can lead to orgasm for both partners without having intercourse. (In fact, few girls have orgasms through sexual intercourse alone, often they need to have their clitoris touched at the same time — but make sure you read the "Check It Out" box on page 78.) Foreplay includes mutual masturbation — rubbing and stroking each other's penis or clitoris. It also includes oral sex, when one or both partners use their mouth and tongue to kiss and lick their partner's penis or clitoris. BUT don't feel you have to have oral sex if you don't want to. Not everyone enjoys it, and that's fine. (Also, make sure you read about HIV/AIDS on page 101.)

**YOU CAN GIVE** yourself an erection and make yourself come by touching or rubbing your penis. This is known as masturbating. Some people think masturbation is wrong, but it's a perfectly natural thing to do, and almost everyone does it at some time or another.

**OTHER WORDS FOR** Masturbating — wanking, jerking off (usually applies to male masturbation only)

**TEACHING CONSENT TO MINORS:** In CSE, consent is presented to children as young as 4 years-old. Parents believe this will help their children to say "NO" to inappropriate touch and sex. In actuality, it's teaching children to negotiate for sexual pleasure.

# A TRIPLE THREAT LOOMING

CSE is not the only threat in public schools. **Critical Race Theory (CRT)** teaches children to view society through the prism of race, which promotes division. **Historical Revisionism (HR)** teaches that America was not founded in 1776, but rather in 1619 with the arrival of the first slaves. HR seeks to destroy America's actual founding and history with Cultural Marxist myths that turn children toward political and economic Collectivism.

The government, influenced by special interests, shouldn't indoctrinate generations of youth in a monolithic, hedonistic worldview. But public schools are so entrenched with special interests, they may never return to serving their original purpose. Parents must make responsible educational choices that protect kids from this dangerous agenda.

Fortunately, parents are recognizing these serious threats and pulling their children out of public schools in record numbers. Homeschooling is on the rise. There ARE affordable and convenient alternatives. Visit our website to learn more:

**STOP** Sexualization & Gender Indoctrination in Schools!

**EXPOSE** the Explicit Content Targeted at Kids!

## DID YOU KNOW...

Comprehensive sexuality education (CSE), also known as "Abstinence Plus," is aggressively rolling out in classrooms across the nation? Special interests are spending millions to indoctrinate our kids. Teaching materials affirmatively recognize all sexual orientations and instruct children in high-risk sexual behavior. Science is out and social, sexual & political engineering are in. Gender is based on emotions, not biology. Our children are being activated as political pawns to push this agenda. Look inside to see the proof!

# TAKE BACK

## Your Parental Authority!

...THE THREATS...THE INACCURACIES...THE SEXUALIZATION...

**ABOLISHING BINARY GENDER:** Public schools actively deny what they've been teaching in biology class for generations—that there are two genders. Children are taught that gender is fluid, based on emotion. CSE is essentially rewiring how our youngest learners perceive reality. This is emotional child abuse that has led to an epidemic social contagion of transgenderism. According to Abigail Shrier, author of *Irreversible Damage*, (Regnery 2020), from 2016 to 2017, gender surgeries for females transitioning to males in the US quadrupled.

Recommended Books for K-3

CSE teaches that a person with a penis can be a girl and a person with a vulva can be a boy. Videos suggest (Amaze.org) if kids are uncertain about their gender, puberty blockers can pause sexual development while they decide.

**SEXUAL ORIENTATION:** Because CSE must affirmatively recognize all sexual orientations, the mechanics of sex acts are taught including vaginal, anal, and oral sex as well as techniques for using sex toys to augment missing anatomy. Many children are traumatized by the explicit graphic detail of these presentations. However, over time, they become desensitized to these materials. When youth are encouraged to experiment with sexual orientation, they are groomed to embrace sexual behavior that can be deadly.

Curriculum example from "Positive Prevention Plus."

EPISODE 7 Give and Receive: Best Anal Sex Positions with Zoë Ligon. Journalist, educator and Spectrum Boutique owner, Zoë Ligon (she/her), shows off her favorite anal sex positions.

EPISODE 8 Best Toys for Booty Play with Dirty Lola, Alicia Sinclair, Tristan Taormino. Never tried a butt toy? Already have a drawer full of sex toys and want to know what's new and improved? Sex Educator, Dirty Lola, and b-Vibe founder, Alicia Sinclair, answer all your butt toy questions!

SIECUS, the nation's largest activist organization advancing progressive sex education policy across the country, promotes these "B-Vibe" videos and sex toys designed for anal pleasure. (bvibe.com)

**MISLEADING MEDICAL INACCURACIES:**

While condoms DO reduce risk of infection, they cannot eliminate exposure associated with dangerously high-risk sexual contact. In an overzealous pursuit of "inclusivity," educators avoid stigmatizing risky behaviors. This will have deadly consequences.

Based on CDC's own statistics on condom use for anal sex, (<https://www.cdc.gov/hiv/risk/anal-sex.html>) the risk of getting HIV is still between 28-37%!

Since the adoption of CSE in San Francisco, L.A. and San Diego in 2012, and the passage of CHYA in 2016, STIs have skyrocketed among 15-24 year olds.

HOW HIGH IS THE RISK FOR STDs? ANSWER KEY \*

HIGH RISK FOR STDs	LOW RISK FOR STDs	NO RISK FOR STDs
Unprotected vaginal sex	Deep ("tongue") kissing	Bathing together
Unprotected anal sex	Vaginal sex using an external or internal condom correctly	Kissing on the lips
Unprotected oral sex	Anal sex using a condom correctly	Mutual masturbation
	Oral sex using a latex barrier or cut-open condom correctly	Solo masturbation
		Holding hands
		Abstaining from sexual activity

**CUTTING PARENTS OUT OF CHILDREN'S HEALTHCARE:**

Schools instruct minors on their rights to access confidential medical services without parental knowledge or consent. These include abortion, IUD's, sub-dermal, long-acting reversible contraception, and STI/HIV screening and treatment. Activist lawmakers are working to expand this to include transgender hormones, sex reassignment surgeries and drug abuse/mental health treatments.
